

Turntable Divisible Auditorium

Rotating seating sections that create separate lecture halls, performance areas or other rooms that can be used as needed.

Inside view of the space created when the TDA is in the closed position.

Auditorium view from the stage with the TDA in the closed position.

KEY BENEFITS OF MACTON® TDAs

- *Upfront footprint & construction cost savings*
- *More adaptable use of facility*
- *Space for staff, civic and community meetings*
- *Exceptional sound isolation and sight lines create quality instructional or performance space*
- *Ongoing HVAC and other operational cost savings*
- *Better utilization of space to meet daily demands*
- *Full Macton support given to project architects*
- *Reliability of TDAs proven in dozens of U.S. schools*

A Turntable Divisible Auditorium (TDA) utilizes the space of a conventional auditorium and places one or more of its seating areas onto turntables that are capable of rotating to different positions. These unique, turntable mounted, soundproof walls permit simultaneous, multi-use capability and are fully integrated as part of the entire auditorium when they are in the forward-facing position. When turned, they create separate teaching, performance, training or meeting rooms.

To learn how you can integrate a TDA into your next educational facility, please email us at TDA@macton.com, call us at **800-334-TURN** or visit www.macton.com/tda.
